Sana Qureshi

Synthetic persona generated for the GigBid assignment. Not a real person.

Machine Learning Engineer | LLM apps, RAG, NLP and computer vision

Lahore, Pakistan (remote, overlaps EU/US-East mornings)

Rate: $55.0/hr · Job success 93% · 29 completed jobs

Summary

5 years of experience. Core skills: Python, PyTorch, scikit-learn, LLM, RAG, LangChain, NLP, Computer Vision, FastAPI, Docker, MLOps, Vector Database.

Experience

• **Machine Learning Engineer**, Indus Data Labs (fictional) (2020-07 to 2023-03)

• **Freelance ML Engineer**, Independent (2023-03 to present)

Selected freelance projects

• Ticket triage classifier for a manufacturing help desk (2026): routed 67% of tickets automatically.

• Weekly demand forecasting for a real estate business (2026): lowered forecast error (MAPE) from 17% to 11%.

• Churn prediction model for a non-profit subscription product (2026): reached ROC-AUC of 0.82.

• Model deployment and monitoring setup for a hospitality team (2025): cut release time for a new model from 4 days to 2.

• RAG assistant over media support documentation (2025): cut average handling time by 33%.

• Visual defect detection on a manufacturing production line (2024): caught 90% of defects in the hold-out set.

• Model deployment and monitoring setup for a healthcare team (2024): cut release time for a new model from 3 days to 2.

• Meeting and call summarisation for a media sales team (2024): saved reps about 15 minutes per call.

• Weekly demand forecasting for a insurance business (2024): lowered forecast error (MAPE) from 19% to 11%.

• Invoice and form data extraction for a recruiting back office (2024): removed about 16 hours of manual entry per week.

• RAG assistant over manufacturing support documentation (2024): cut average handling time by 29%.

• Semantic product search for a manufacturing catalogue (2023): raised search click-through by 14%.

Education

• BS Computer Science (2020), fictional university for this synthetic persona

Certifications

• Cloud ML specialty certification (2023)
